Adequacy and Effectiveness

- Adequacy:
 - Materiel covered known facts at time of printing. Inputs derived from multiple sources: SSF Directorate staffs/teams, DFAS, AMC, III Corps, ARNG, USARC, ILAP folks, etc.
 - SIT generated minor changes. Presentations were actively modified as necessary.
 - Final MS3 changes not available until post VIOC.
- Effectiveness
 - Overall student ratings: Predominately Good to Excellent; training books well received. Too much details for some/redundancy for others.
 - Initial sessions – basis for enhancements.
 - Course schedule changes at Ft Hood – required course flexibility.
 - AMC's internal training continues. HQ wrap-up in progress. First session at Natick – well received.
 - ARNG materiel will be simplified.
 - AAR refinements planned before MS 3 Implementation.
